Purpose. This SAP Web dispatcher function provides additional security. In addition to the secure configuration with a firewall and a demilitarized zone (see the graphic in Architecture and Functions of the SAP Web Dispatcher), you can use the URL filter to prevent external users from executing applications. Even if users are able to log onto the SAP System without permission, you can set ...

SAP Web Dispatcher as a URL Filter - SAP Documentation

Execute all URLs that the SAP Web Dispatcher is to permit and at the end of the table set row D * . In this way URLs that are correct might still get rejected (in the example above /sap/bc/ping , which would definitely be recognized by the ICF), but you do not have the problem, that URLs could bypass the Web Dispatcher because they are written differently to a prohibited URL indicated with a D .
