The Next Generation Science Standards (NGSS) are K-12 science content standards. Standards set the expectations for what students should know and be able to do. The NGSS were developed by states to improve science education for all students. A goal for developing the NGSS was to create a set of research-based, up-to-date K-12 science standards.

Next Generation Science Standards

Grade inflation (also known as grading leniency) is the awarding of higher grades than students deserve, which yields a higher average grade given to students.. The term is also used to describe the tendency to award progressively higher academic grades for work that would have received lower grades in the past.

Metrology is the scientific study of measurement. It establishes a common understanding of units, crucial in linking human activities. Modern metrology has its roots in the French Revolution's political motivation to standardise units in France, when a length standard taken from a natural source was proposed. This led to the creation of the decimal-based metric system in 1795, establishing a ...
